## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It has been held the recitation that an element is "capable of" performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138.

### ***Priority***

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in 10/667,598 on September 23, 2003. It is noted, however, that applicant has not filed a certified copy of the JP P2002-278987 application as required by 35 U.S.C. 119(b).

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2832

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Takano (5,365,028).

Takano teaches a slide switch (see figs. 6-7) comprising:  
a pole board 10d with a fixed contact 22;  
a movable board 12 supporting a movable contact 16; and  
a metal plate (see fig. 6 for fixed contact 22) is insert-molded at a portion, which the fixed contact of the pole board is not present.

Regarding claim 2, the metal plate is integrally extended from the fixed contact 22 (see fig. 6).

6. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Uchiyama (5,720,385).

Uchiyama teaches a slide switch comprising:  
a pole board 7 (see fig. 2) with a fixed contact 10;  
movable contact 24; and  
a metal plate extending from the fixed contact 10 is inserted into the board 7 (see fig. 5).

### ***Conclusion***
